Work Experience

User Interface Engineering Intern | Quora

May 2015 - August 2015

- Designed and built front-end abstractions in JavaScript and Python.
- Worked closely with designers to build technically complex reusable components and interactions.
- Optimized JavaScript and LESS rendering performance.
- Ran user interface tests that increased user signups and activity.

Software Developer | Broadconnect Telecom

September 2014 - December 2014

- Built a custom ticketing and support system to replace Zendesk.
- Wrote new modules and updated existing ones to use AngularJS and a REST API.

Software Developer | Broadconnect Telecom

January 2014 - May 2014

- Full stack web development on a small team to build a web portal.
- Integrated Zendesk into a web portal for ticketing and support.
- Designed/developed mockups, static HTML, Django templates, and backend controllers.
- Worked with SQL and Redis databases.

Relevant Experience

Machine Learning Course | Coursera

Current

- Currently taking a course on machine learning, offered by Stanford, covering linear regression, logistic regression, and neural networks.

Terminal Slack | Personal Project

Current

- A Slack client for the terminal built with Node.js.

Weathery | Personal Project

March 2015

- Simple Chrome extension for displaying the weather forecast.

Jams with Me | EngHack

November 2014

- Share a link to create music together in real time. Built with Express.js and Socket.io.

FIRST Robotics | Martingrove Collegiate Institute

September 2013 - March 2014

- Built and programmed a robot to compete in a FIRST robotics competition.

Achievements

- Dean's list: Ranked second in class, University of Waterloo, 2015
- President's Scholarship of Distinction, University of Waterloo, 2013
- AP Scholar Award, College Board, 2013

Education

Systems Design Engineering, University of Waterloo

Expected graduation date 2018
